Engineer's Estimate: \$200,000-\$300,000

Contractor California License Requirement: Class A

Contractors are required to possess a City of Coronado Business License prior to construction

Notice is hereby given that the City of Coronado has determined that all bidders on the installation and maintenance of an adaptive traffic signal system adjacent to the Naval Amphibious Base must be prequalified prior to submitting a bid on that project. It is mandatory that all contractors who intend to submit a bid fully complete the prequalification questionnaire, provide all materials requested herein, and be approved by the City of Coronado to be on the final qualified bidders' list. No bid will be accepted from a Contractor that has failed to comply with these requirements. If two or more business entities submit a bid as part of a Joint Venture, or expect to submit a bid as part of a Joint Venture, each entity within the Joint Venture must be separately qualified to bid. The last date to submit a fully-completed questionnaire is February 15, 2017, prior to 4:00 p.m. Contractors are encouraged to submit prequalification packages as soon as possible so that they may be notified of

omissions of information to be remedied or of their prequalification status well in advance of the bid advertisement for this project.

Answers to questions contained in the attached questionnaire, information about current bonding capacity, a notarized statement from surety, and the most recently reviewed or audited financial statements, with accompanying notes and supplemental information, are required. The City of Coronado will use these documents as the basis of rating contractors with respect to the size and scope of contracts upon which each contractor is qualified to bid. The City of Coronado reserves the right to check other sources available. The City of Coronado's decision will be based upon objective evaluation criteria.

The City of Coronado reserves the right to adjust, increase, limit, suspend, or rescind the prequalification rating based on subsequently learned information. Contractors whose rating changes sufficient to disqualify them will be notified and given an opportunity for a hearing consistent with the hearing procedures described below for appealing a prequalification rating.

While it is the intent of the prequalification questionnaire and documents to assist the City of Coronado to determine bidder responsibility prior to bid, neither the fact of prequalification, nor any prequalification rating, will preclude the City of Coronado from a post-bid consideration and determination of whether a bidder has the quality, fitness, capacity, and experience to satisfactorily perform the proposed work, and has demonstrated the requisite trustworthiness.

The prequalification packages should be submitted under seal to Engineering Division, City of Coronado, 1825 Strand Way, Coronado, California 92118 and be marked "CONFIDENTIAL – Adaptive Traffic Signal System Project – Prequalification" prior to 4:00 p.m. on February 15, 2017.

The prequalification packages (questionnaire answers and financial statements) submitted by Contractors are not public records and are not open to public inspection. All information provided will be kept confidential to the extent permitted by law. However, the contents may be disclosed to third parties for purpose of verification, investigation of substantial allegations, or in the appeal hearing. State law requires that the names of contractors applying for prequalification status shall be public records subject to disclosure, and the first page of the questionnaire will be used for that purpose. Each questionnaire must be signed under penalty of perjury in the manner designated at the end of the form, by an individual who has the legal authority to bind the contractor on whose behalf that person is signing. If any information provided by a contractor becomes inaccurate, the contractor must immediately notify the City of Coronado and provide updated accurate information in writing, under penalty of perjury.

The City of Coronado reserves the right to waive minor irregularities and omissions in the information contained in the prequalification application submitted, to make all final determinations, and to determine at any time that the prequalification procedures will not be applied to a specific future public project.

Contractors may submit prequalification packages during regular working hours prior to 4:00 p.m. on February 15, 2017, on any day that the offices of the City of Coronado are open. Contractors who submit a complete prequalification package will be notified of their qualification status.

The City of Coronado may refuse to grant prequalification where the requested information and materials are not provided, or not provided by February 15, 2017. There is no appeal from a refusal for an incomplete or late application, but reapplication for a later project is permitted. The closing time for bids will not be changed in order to accommodate supplementation of incomplete submissions, or late submissions.

Where a timely and completed application results in a rating below that necessary to prequalify, an appeal can be made. An appeal is begun by the contractor delivering notice to the City of Coronado of its appeal of the decision with respect to its prequalification rating, no later than ten (10) business days after notification of prequalification status has been received. Without a timely appeal, the contractor waives any and all rights to challenge the decision of the City of Coronado, whether by administrative process, judicial process, or any other legal process or proceeding.

If the contractor gives the required notice of appeal and requests a hearing, the hearing shall be conducted so that it is concluded no later than five (5) business days after the City of Coronado's receipt of the notice of appeal, and no later than five (5) business days prior to the last date for the receipt of bids on the project. The hearing shall be an informal process conducted by a panel to which the Coronado City Council has delegated responsibility to hear such appeals (the "Appeals Panel"). At or prior to the hearing, the contractor will be advised of the basis for the City of Coronado's prequalification determination. The contractor will be given the opportunity to present information and present reasons in opposition to the rating. Within one (1) day after the conclusion of the hearing, the Appeals Panel will render its decision. It is the intention of the City of Coronado that the date for the submission and opening of bids will not be delayed or postponed to allow for completion of an appeal process.

**Note:** A contractor may be found not prequalified for bidding on a specific public works contract to be let by the City of Coronado, or on all contracts to be let by the City of Coronado, until the contractor meets City of Coronado's requirements. In addition, a contractor may be found not prequalified for either:

- (1) Omission of requested information; or
- (2) Falsification of information

# INSTALLATION AND MAINTENANCE OF AN ADAPTIVE TRAFFIC SIGNAL SYSTEM ADJACENT TO THE NAVAL AMPHIBIOUS BASE

## A LIST OF THE SCORABLE QUESTIONS AND THE SCORING INSTRUCTIONS

The scorable questions arise in three different areas:

- (I) History of the business and organizational performance;
- (II) Compliance with occupational safety and health laws, workers' compensation and other labor legislation; and
- (III) Completion of recent projects and quality of performance.

The interview questions (interviews by the public agency of project managers on projects completed recently by the contractor) are included in Group III. In a prequalification procedure for a single project, this last category would also include a scoring of the number of recently completed projects that are similar to the project on which prequalification is at issue.

**Note:** Not all questions in the questionnaire are scorable; some questions simply ask for information about the contractor firm's structure, officers and history. This document includes only those questions that are "scorable." The question numbers in this document are the numbers used in the questionnaire. Thus, the questions included here begin with question number 6, and there are a few breaks in the numerical sequence.

### The Scores Needed for Prequalification

To prequalify, a contractor would be required to have a passing grade within each of the three large categories referred to above.

For Section I, History of the business and organizational performance, the City will use the DIR recommended passing score of **57** on this portion of the questionnaire (of a maximum score of 76 on this portion of the questionnaire).

For Section II, Compliance with occupational safety and health laws, workers' compensation and other labor legislation, the City will use the DIR recommended passing score of **38** on this portion of the questionnaire (of a maximum score of 53 points on this portion of the questionnaire).

Section III, Completion of recent projects and quality of performance, includes a series of interview questions, and may also include questions about recently completed (public or private) construction projects. For the interview questions, the City will use the DIR recommendation to interview project managers for the owners of two completed projects. The City will also use the DIR recommended scoring system that would allow a

maximum score of 120 points for each interview. For these questions, the City will also use the DIR recommended qualification for a contractor whose score on each of two interviews is 72 points or more; a denial of prequalification for a contractor whose score on either interview is less than 55 points; and an additional interview with another reference if the score resulting from one interview is between 55 points and 72 points.

DIR makes no recommendation about how to score a contractor's answers about recently completed past projects. Because of the wide range of projects that a public agency may be planning, and the similarly wide range in the skills, abilities, and experience that a public agency will consider most important for a pending project, it is impossible to propose a useful model scoring system to apply to the answers given about a contractor's completed projects.
